FOLKS, This Is Serious!

If you were to die tomorrow, would your insurance and retirement plan deposits go to those whom you want to have them?

Maybe you have acquired a new wife or a new child since you made out your insurance application and enrolled in the retirement plan. Check with the SAFETY DEPARTMENT and SAM RUNYAN at once to see that your beneficiaries are up-to-date.

PORT ORFORD SEEDLINGS will be ready for distribution here at the plant during the week beginning March 29, according to word received from our Timber Department. If you wish to place an order for a bundle (25 two-year old seedlings) please fill out a blank at the Clockroom. Gifts are being limited to one bundle per person in order to fill all individual requests. A special request for a public planting at Lewisville Park is being referred to our Forestry Department. This is the 11th consecutive year that Port Orfords have been distributed to our people. These seedlings are grown at the Forest Industries nursery at Nisqually, Washington, from which 10 million seedlings will be lifted this year for planting on tree farms of the Northwest.
